Cameron Lucas
Full-Stack Software Engineer

(720) 451 - 1256   Westminster, Colorado

Linkedin   cameronlucasaim@gmail.com   Portfolio

I'm a Full-Stack Software Engineer with a passion for business, people, and technology. I have a background in logistics, management, and business. My goal is to develop software that inspires, connects, and drives business, communities, and the future.

Skills

Languages: HTML // CSS // Javascript // Ruby // Python
Frameworks/Libraries: React // React-Native // NodeJS // ExpressJS // Rails // Django
Databases/Dev Ops: MongoDB (noSQL) // Postgresql // Git // Docker // Nginx // AWS

Projects

Enroute Logistics Inc - Full Stack Application
Technologies: MongoDB, Strapi.IO (Headless CMS), ReactJS, NodeJS)
https://enrouteinc.com/
Web application for a medium-sized Amazon delivery partner and its employees. The website creates a point of contact for the company. There is also an employee portal where employees can view important information and find other resources.

Stocky - Inventory Management System
Technologies: Express, NodeJS, MongoDB, Bulma.io
https://github.com/CamSkiTheDev/Stocky
Full-stack inventory management application built to demonstrate a working knowledge of dynamic, server-side rendered, web applications.

The Life Of A Dev - Youtube
https://youtube.com/c/thelifeofadev
Small Youtube channel with 1.4k+ Subscribers & 127,000 video views, focused on everything development. Featuring videos on everything from video gaming modification in C#/C++ to NodeJS tutorials.

Experience

Full Stack Developer // System Administrator // Technical Director
Swyft On-Site Services // Denver, CO // Jun 2020 - Present
- Designed and developed multiple React and React-Native apps, as well as backend APIs. Swyft On-Site Services is a technology-driven mobile oil & tire shop.
- Configured and managed multiple cloud servers/services to run our mail servers, application servers, and databases, etc.
- Responsible for all technical decisions, as well as the design, development, and DevOps of all applications at Swyft On-Site Services.

Freelance Full Stack Developer
SiteIT Solutions // Denver, CO // Oct 2018 - Jun 2020
- Designed, developed and deployed, applications for small to medium size companies.
- Most common stack for new projects (MongoDB, ExpressJS, ReactJS, NodeJS). Also worked with some legacy apps and WordPress websites.

Education
